Experience

Indie Developer — Feb 2026 – Present
Self-employed — *Delhi, India*

- Shipped and maintained independent apps, Chrome extensions, and web products across the App Store, Play Store, Chrome Web Store, web, and GitHub.
- Built full-stack, mobile, automation, AI, and open-source projects end-to-end from idea to release.

Full Stack Developer Intern — Nov 2025 – Feb 2026
XIRCLS — *Mumbai, MH, India (Remote)*

- Built and stabilized end-to-end CRM features covering Leads, Accounts, Authentication, Reminders, and Interactions with full CRUD, pagination, filtering, soft delete, and restore.
- Integrated frontend and backend APIs, resolving schema mismatches, UUID handling issues, and authentication/authorization gaps.
- Fixed critical security and data integrity issues, including session cache leakage and ownership validation flaws.
- Improved real-time UI updates and performance using React Query cache invalidation and optimized detail pages.
- Strengthened form validation and UX flows, including mandatory fields, auto tab-switching, and safer save actions.
- Served as project lead intern, coordinating tasks and reviewing work for a team of 5 interns.

AI Trainer — Apr 2025
Soul AI — *Hyderabad, TG, India (Remote)*

- Evaluated educational conversations from Gemini 2.5 Pro (Experimental) and ChatGPT-4o under Project Ceres, assessing reasoning quality and factual accuracy.

AI Trainer — Feb 2025 – Mar 2025
Outlier — *San Francisco, CA, USA (Remote)*

- Supervised AI function-calling processes and tool use in projects like Attenuation Stamp; improved AI reasoning across STEM and philosophy domains in Mail Valley.
- Designed complex image-based questions to challenge AI models and analyzed responses in Mighty Moo; conducted preference evaluations and ranked model outputs as part of Pro Evals.
- Developed the Gallon Hamster, a multi-discipline multimodal reasoning system (SFT Phase 2); identified platform issues and provided critical feedback during Nanoparticle Baobab and Normal Sultan.
